When personnel exposures to the hazards are eliminated, or at least diminished to levels not exceeding mandated limits, through the use of appropriate administrative or engineering controls, or personal protective equipment, then there is no personnel exposure and it is not necessary to file an occurrence report.

ORDER NO.	SUBJECT	OPIDATED
DOE N 350.6	ACCEPTANCE OF VALID WORKERS' COMPENSATION CLAIMS	EH 01-12-01

Clarification for DOE N 350.6:

- A. Claims Covered by Notice. Currently there has been no direction from DOE Headquarters that the Notice will be expanded, and, therefore, at this time, the Notice applies only to claims associated with (i) an "occupational illness", as defined in the Act, or (ii) a death arising out of an "occupational illness." Should this change in the future; you will be given written direction from the Contracting Officer prior to any requirement being put in effect.
- B. Direction on Meaning of a "Valid Claim". A "valid claim", for purposes of Subtitle D of the Energy Employees Occupational Illness Compensation Program Act (EEOICPA) shall mean one that has been accepted by the Secretary pursuant to the provisions of 10 CFR Part 852, Guidelines for Physicians Panel Determinations on Worker Requests for Assistance in Filing for State Workers' Compensation Benefits.

Should the DOE decide to accept a claim or award, the Contracting Officer (CO) will provide written direction to BBWI to discontinue any contest of the claim. Upon receipt of such written direction, BBWI will be required to stop any further contest of the claim in order to avoid the incursion of unallowable costs. Should written direction be given to accept the claim, any additional costs in the form of a retrospective premium would be allowable.

- C. Agreements with Idaho. Although Section 3661(a) allows DOE to enter into agreements with states to provide assistance to employees in filing workers' compensation claims, there has been no such agreement as yet. If such agreement is entered into with the State, the CO or the Contracting Officer Representative (COR) will provide written notification and provide any required clarification and/or direction at that time.
- D. Claims of subcontractor employees. Sub-contractor employees should be directed to file claims with their employer/subcontractor's surety. Should there be changes to this arrangement, the CO will provide written notification to BBWI and provide clarification at that time. As the DOE develops guidelines for administering its portion of the Act, the CO or the COR will provide these to you and any necessary direction will be provided in writing.

In summary, the Notice shall be interpreted as to apply only to those illnesses and deaths, as defined in the Act; until a claim is found to be valid by the Secretary, as described in paragraph B above or until BBWI receives a CO directive to stop contesting a claim or award, the costs attributed to such contest would be allowable; if an agreement is entered into with Idaho per the EEOICPA, the agreement and direction will be provided to BBWI; and, claims of sub-contractor employees should be filed with their employer's surety.

Clarification for DOE N 473.7:

Explanation of Explosive Detection Policy

This explanation is intended to clarify DOE Notice 473.7, *Explosive Detection Program*, dated 10-26-00, paragraph 4a. The intent is to require a thorough screening for explosives prior to entry into a materials access area (MAA). This screening can either be accomplished at the protected area (PA) entry portal or it can be accomplished at the MAA entry portal.

The Sandia National Laboratories Explosive Protection Technology Transfer Manual (EPTTM) provides a DOE resource for explosive detection needs. The EPTTM provides information ranging from basic information about explosives, to the selection of contemporary explosive detection devices, and to consequence based analysis and manual search techniques for mitigation. This should be used as a guide for implementing explosive detection programs.
